Education

JK Lakshmipat University, Jaipur, Rajasthan BTech Computer and Communications Engineering (CCE) (2023-27)	CGPA: 7.48 (3 rd Sem.)
Maheshwari Public School, Pratap Nagar, Jaipur, Rajasthan CBSE 12th (2022)	Grade: 79.2%
Maheshwari Public School, Pratap Nagar, Jaipur, Rajasthan CBSE 10th (2020)	Grade: 91.8%

Academic Projects

- **BCD to 7-Segment Display Decoder**
Platform/Technologies used: Xilinx Vivado, VHDL
Designed and implemented a combinational logic circuit that converts Binary Coded Decimal (BCD) input into a 7-segment display output. Utilized logic gates and multiplexing techniques to correctly display numbers 0-9. Demonstrated proficiency in digital design, binary-to-BCD conversion, and hardware interfacing using VHDL on Xilinx Vivado.
- **Digital Stopwatch using 7-Segment Display**
Platform/Technologies used: Xilinx Vivado, VHDL
Implemented clock division to generate a 1 Hz timing signal, designed a finite state machine (FSM) for control logic, and utilized counters for timekeeping. Controlled a 7-segment display to show elapsed time in seconds and minutes.
- **JK-Buzz – University Communication App**
Platform/Technologies used: Figma
Developed JKBuzz, a campus communication app for JKL U using Design Thinking. Conducted user research, ideated solutions, and designed Figma prototypes to enhance connectivity and community engagement.
- **Triply – Group Travel Management App**
Platform/Technologies used: HTML, CSS, JS, Java, PostgreSQL
Created an all-in-one group travel management application during LNMIIT's LNMHacks v7.0 Hackathon, integrating real-time expense splitting, itinerary planning, and group chat functionalities to enhance collaboration and streamline travel coordination.

Skills

- Programming: C, Python, VHDL
- Web Development: HTML, CSS
- Embedded Systems & FPGA: Xilinx Vivado, VHDL
- Simple Signal Analysis

Certifications

- Hands-on Training, Research Aspects and Demonstrations in 5G Use Case Lab | AICTE Training and Learning (ATAL) Academy | (Punjab Engineering College)
- C Programming for Everybody | University of Michigan | Coursera
